

TECHNICAL DATA SHEET

ENVOMATIC RINSE AID HARD WATER – 0934

Permits a rapid reduction in the surface tension of water, eliminating water spotting on rinsed articles and ensuring the drying of cutlery and crockery without the need for drying by hand.

- ❖ Formulated to prevent scale and bloom formation

USES:

For use in automatic dishwashing machines to eliminate water spotting on rinsed articles and ensure the drying of cutlery and crockery without the need for drying by hand. Specially formulated to prevent scale and bloom formation.

DIRECTIONS:

Designed to be automatically dispensed into the final rinse water by electronic control pumps. Use at a dilution rate of 300 – 500 ppm.

For optimum results the rinse water temperature should be in the range of 80 – 90C.

TECHNICAL SPECIFICATION:

Appearance	Blue liquid
Odour	Characteristic
pH	7.5
Density	1.008 – 1.018 @ 20C
Water solubility	Fully soluble
Stability	Stable under normal conditions

Use common sense precautions when handling chemicals.

Safety: Keep out of the reach of children.

If swallowed seek immediate medical advice immediately, showing this label.

In case of contact with eyes rinse immediately with plenty of cold water and seek medical advice if irritation persists.

After contact with skin, wash immediately with plenty of water.
